

Assembly & Mounting Instructions

Dear Friend,

Thank you for purchasing the new Cascade Gardens™ Adjustable Height Trellis. Constructed of durable, powder-coated steel and UV protected plastic components, your trellis was designed to last for years.

Before you start:

1. Your indoor/outdoor trellis includes wood screws. Choose the location and determine if you will need additional mounting hardware for hollow-wall, metal or masonry.
2. Make sure the location is ideal for plant growth - sun or shade.
3. Identify each component on the parts list.
4. Tools you will need: scissors, Phillips-head screwdriver & tape measure.
5. This product carries a 1-year limited warranty against defects in material or workmanship from the date of purchase. If you have any questions or need assistance, please contact customer service

Package Contents		
Item	Parts Description	Quantity
1	Upper male cord lock	5
2	Upper female cord lock	5
3	Lower male cord lock	5
4	Lower female cord lock	5
5	Mounting bracket	1
6	Weight bar	1
7	Cords	5
8	Wood screws	2

Step-1. Mounting Bracket

Install at desired height with Phillips head screwdriver and provided screws. Please note the maximum distance from the bottom of the mounting bracket to the ground is 74 inches.

Step-2. Upper cord lock assembly

Install cords into upper cord locks and tighten by screwing together.

Note: Leave cord just inside top hole.

Step-3.

Install one cord lock assembly from step-1 into mounting bracket.

-OVER-

Step-4.

Install weight bar and lower cord lock (tighten half way). Raise lower cord lock roughly 2 inches above ground and tighten.

Step-5.

Install cord lock assembly on other side, making sure weight bar is level.

Step-6.

Add three remaining cord lock assemblies.

Step-7.

Cut cords flush with bottom of cord locks.

Step-8.

Planting - Flower and Vegetable Vines
Seeds - Sow evenly on either side of weight bar. Plants - Plant directly under center of weight bar and place vines on either side of trellis.

If required, holes can be used for ground anchors for larger plants.

Lamp post model & future designs coming soon.
