

WEED REDUCER

Helps reduce the amount of stringy weeds and vines that wrap around the tine shaft of the transmission. If weeds ever do wrap around the tine shaft, it's easier to remove them.

Installation and Use

Simply slide the Weed Reducers over the extended part of the tine. The larger part of the Weed Reducer should face transmission.

Extended part of the tine that slips onto the tine shaft

Weed Reducer (Larger side faces the transmission)

Slide the tines onto the transmission tine shaft and re-insert the tine pin.
