

How to create a garden with the Mantis Electric Tiller/Cultivator

With the Mantis Electric Tiller/Cultivator, you will discover just how easy, and fulfilling it is to create your very own vegetable or flower garden that you and your family can enjoy year after year!

Pick an area and stake it out. Use the optional Border Edger Attachment to cut the sod.

Remove the top layer of sod.

Till the soil. The Mantis Electric Tiller/Cultivator tills down up to 10" deep.

Mix in the proper mix of fertilizer or manure.

Plant vegetables in row.

Weed between the rows during the season with the Mantis Electric Tiller/Cultivator. Tines switch easily from tilling to shallow cultivating.

Stand back and enjoy the results.

In the fall, you can till in spent vegetables with the Mantis Electric Tiller/Cultivator.
